

24/7 RENTAL SOLUTIONS

WHEN YOU WANT IT, WHERE YOU NEED IT!

Stewart & Stevenson offers five engine-driven generator systems—Taylor Power, MTU, MQ Power, Atlas Copco, and Stewart & Stevenson custom—for industrial, residential, and communications applications. Choose from single or parallel, skid-mounted or trailer-mounted, sound attenuated generators ranging from 100–2000 kW. Our units are industrial grade and can be utilized for standby and /or prime power applications, including new construction, municipal, disaster relief and hospital applications.

RENTAL GENERATOR FEATURES

- Meet or exceed all EPA and CARB emission standards
- Double-walled fuel tank with 24-hour on-board fuel capacity
- Single-point lifting capability
- 3-way fuel valve to easily connect external fuel source for extended run
- Lockable external fuel fill source
- Customer-convenient cable connections
- Oil-field duty skids or trailer mounted
- Backup (reserve) lube oil makeup tank
- Environmental fuel spill containment
- Double-walled remote fuel cells
- 50 Hz or 60 Hz operation capability, single- or three-phased voltages
- Hi/Lo voltage switchover or simultaneous dual voltage
- Oversized alternator for superior motor starting capability
- Overspeed protection
- Remote operation and monitoring for units 500 kW and above
- Customer-convenient electrical outlet
- GFI distribution and cable available

COMPRESSORS

Stewart & Stevenson offers a full line of air compressors from Atlas Copco and Sullair—electric, oil free and diesel powered units offering from 400 cfm to 1600 cfm for stationary and portable applications—along with a line of compressed air equipment. Rental fleet units from Stewart & Stevenson are designed to service all needs:

- Diesel and electric oilfree compressors from 785 cfm to 1500 cfm
- Diesel- and electric-driven air compressors from 400 cfm to 1800 cfm, 80 psi to 500 psi
- Compressed air treatment equipment including:
 - Refrigerated and desiccant air dryers from 10 cfm to 20,000 cfm (+38 to -100°F dew point)
 - Compressed air filters to supply instrument-quality air
 - Hose and cable are available
- Aftercoolers (5–20°F) remove 65–70% of moisture from compressed air
